In land

Do they leave

The walls

Of ice

09:15 AM marked the clock in this suffocious and sad little room of gray, my eyes just open and they would intend to give me a panorama of where I really met. I must admit that it costs me every day to adapt me to this world, my mind takes minutes to realize that I find myself again in the "walled land" where they stepped onMy ancestors.
I found a perish rolled in the door that delights June 22, as they do the dash with here, each faithful to its grilled soil, where I could see that nothing can be left of the notebook, that mundane booklet that created for the forced partners of this abyss, dark and sinister, a humanity that seems to be disagruited daily without realizing that he does some of the raws reality that they left that long time all of you all becomes immovable, unmobileable, this can not be called, life I was for a while interior, I thought of the interior every time I visited the lands where I nacid my father, my grandparents, those who left their lives to see a free humanity, and I find me¬I do with this, my heart hurts to imagine the bones of my brothers who must still be buried here in these lands, who left their lives so that everything was different. Curious way of living thought he thought as he gently and turned off his small veneer next to an old bed, here is no doubt there is an extra way of creating a false need for objects. This humanity seems to be paying for the sin that his past has tried to be free, understanding it, althoughit isVery unfair

and it is a spine that we have all those we come from the other side, on the free side of the Mur alias of ice."Payfor a place where they were born "thisphraseHe turned and turned on my head, that's why he watched well the faces of those adventurers who managed to find the other lands, the lands of the giants, or the lands where I was born to so many kilometers of here, but there was toto payA very high price, so I return, that's why my father Murid leaving his legacy, we never forget the new humanity that nacted in these private departments of his freedom and his verification history, it is like it's time to start opening those "fallen walls" as I likeCall them, who terrifying us for a past where a war is lost, but gains freedom, that the dead have not been in vain or forgotten as the custodians want, they buried a large part of human history and manipulated them, and the worst of all is that they convinced them and now they are debremeting this story and the soil that inhabit. This world is a very difficult place to survive, there are also a high toxicity in what is breathed, eats, drinks, also dangerous enough to get a little friendly place and for that who manages to escape, with little desire to return, but as I always say, in my heart I have these lands so reheared, when floor this floor I reconnect with my past, with my dear father, William Morris, who will defend and rescue this new humanity of the hands pa¬Rasuals of the custodians.
In addition, the number of wars that livedThroughout the years and still continue to live is really detestable, as they have even so as a basic way as putting different colors in imaginary limits or beliefs of all kinds to divide, with that you can only generate that millions of people lose their lives even many voluntarily thinking that they do it in a fair cause.

The only fair cause is freedom, and that freedom can be achieved only by knocking down the curtains around these lands, lifting the veil has a high price,

but it is always worth knowing the datard, although this is the last thing you can write.

Innocent equations have left the life for this reason? Iquien does not want to know the true story of our past?

In this book we try to wear clarity, the more that can be on the subject of the "known lands" andThe "other worlds" behind the walls of ice, I will also try to leave detail of everything we know about the civilizations of each of these, also called, "circle-environments", and a brief history of which we become known, thanks to the book of "She-ki" the giant-human that gives him to my father the knowledge that nobody knows in this new humanity, due to the great existing manipulation and the strong conditioning that they do not have the most unidentified that they do not have an exploitation that the children.

The important thing is that one person has found me that really was interested in listening to my story, even though I had not revealed my true name or from where I had come, that we have also been studying this new humanie¬Dad for a long time, we would not rely for this long research and information if we did not know that it will be delivered with all the respect and the way we want, in addition that it has been urgent, notWe are here to scare anyone, nor give dates of cataclysms or "reset" (or restartings), but if we are aware and understand that the situation of the last years is increasingly delicate, understand¬Let us know that this process can be accelerated and we are aware of the resulting causes and effects, if not I still have, my name is Helen Morris, daughter of the navigator William and born in land that you certainly do not know almost 8000 kildents behind the walls of ice in direction that they do as "south".

Before taking them along the path of "terrain infinite" and its history, they must understand that

much of these texts would not go in line with what is learned by you in this "cfrucle- environment" (also explain from where this term comes), much of history here counter is possible that you keep it inside and that this book can open this cause. Much of the histoRia liveevenWith you, because you were also part of some way, just that they have slept them, anesthetized completely,untilTaipointwhat to live thislife seemsThe normal,a lifethat one oneit seems to basemerelyonActionsrobotic,repetitive, very fewbasedin love and empathia, the divisionit iseverydaymoreeasyAnd by any reason, and the great media take advantage of any of these weak points that come to be long-term.

It is important that you can contrast this information, you should not believe anything about us, but you should question everything, what you have learneduntilNow and what they want to learn to force you, try always to surround yourself from people who not only give a message of empathy and love, but really carry it forward and do not generate divi¬Sion.
That's why not being surprised if something of this is familiar with you, you embrace the ideas you like to you, get aborted and strongly confer in what you feel, in what comes from your heart, your mind tried to manipulate it and confuse it.

My father left these lands in times of war, and I returned to find it in almost the same situation, as they will see, the security that one looks for times of war, is the same as generated, said otherwise, there is no Tai Security by NO
Country, nor Government, nin political party, nor any lider of any Indoe, are only the human ones who handle the threads from the darkness (today), called "custodians", "The Watchers", "VI¬Gilantos "," Caregivers "," The corrupt brotherhood "," the savings of the tree "," Kuijas "," Absorbes Energies ", and I think I've heard many other terms, but we will stay with the firstof them, although I soil calls "the

race parasi¬Taria ", it perfects them.

They are here from almost the beginning of the humanity, and we like or not, they manage and have the control of these lands today, day,*(_Se*You can do something against this?, the answer is simple: yes, but for that we have to enter us in many points and be able to find a lot of your weaknesses like like! Strengths, knowing the enemy is the
The best way to be able to get free to control and control / and end up over it.

CHAPTER 2-THE

Great dome

Before entering into each of the worlds, it is necessary to make a salve and clarify that "the Great Dome" means and to which we referred to when we mention it.

"The Great Dome" or also called "the end of the other thing," is what a newly recover and contains all the other known worlds, very few were able to see this end and even "to" Carlo ", Ise can really touch?

It's more, it's been told that some experiments were made to cross it but it was not possible,

is theTERROR OF VARIATION COLLABORATOR CIVILIZATIONS that do not sleep calmly, since any race of outside could take off fromaday to the other the power they keeponthispyramidHeeper that themselves armed during the story.

Another world that generates terror are the "celestial lands" but we will have time to detailthismysterious place that keeps greatrelationshipwith the human being.

In this"Great Dome" 178 worlds or "circle-environments" are known, which in turn can have one or more domes that also enclose them with their different climates and civilizations. Penetrate these domes from each circle is not simple task. When spending time the technique has been perfecting and now there is a lot of technology to be able to carry it out, but this was developed exclusively by colonizing races, many other racesThey explored surrounding these worlds or simply the independent lands (mandatories of domes).

These domes are almost impossible to cross a via air, and almost always looking for another form by land, but the most common is that it can be done through the water that is where they are easily easier to open the passages that can co¬Necturing the interior-exterbounds, almost as two membranes in any cell, running as a barrier and can allow at the time the step.
(When you have a greater control for power pe¬Net that some specific domes, can be made via an air without further inconvenient, although it can be quite dangerous for reasons we will see later).

A long time after several "portions" that were connected even several of the worlds, in the mid-exclusive ", in the mid-circus, the manipulation ofThese portals was so great that many problems were caused and some became unable to make

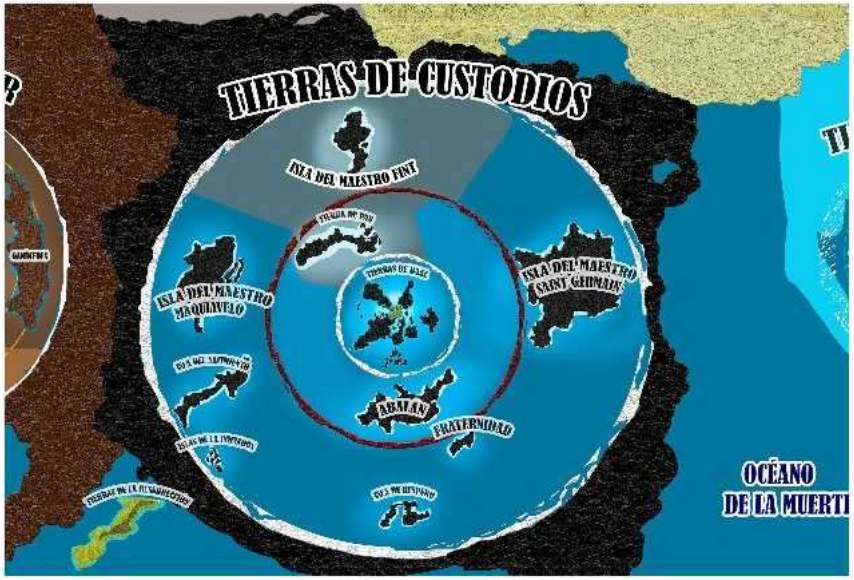
some beingshavedisappeared without knowing where they really were or if thisI I causeThathaveDisintegrate your material. Todayit's a comfind beings in full development of portals that can connect certain areas within the Great Dome, without everhavePredentially.

When we talk about the 178 worlds we are not reference to the independent lands that exist between the worlds, these are lands that exist and that were used by several races when they could go outside, in fact, it is said that these lands exist to avoid large S DNATIVES that connect the worlds, andit isa way of being able to establish Alii to be able to turn out to another destination, it is believed fervently that the mun¬Two were made to investigate them and that all in one way or another, let's go out to the outside toFind our freedom, know other races and be able to let ussomedayin what can be found so much in the '' celestial lands "asbehindof the "Great Dome".

CHAPTER 3 -

The lands of

The custodians



exploitation of other lands, as well as the beings that can find.

Its start is unclear and full of questions, there are theories between the giants where it is counted

That the custody race was attacked by some other that he does not even come from this great dome, and that they were merged with the premises to create a great force that then gave rise to the custodians.

This explained the reason for its great development over other races that were still in pawns to try to survive within their circles.

Custodians referred, were the first to leave their world and advance on their way to the others, with great destructive power and colonizer, having reached each of the worlds and temporary to explore around the well-known "end of the worlds".

Although they have been defeated at least two convenience opportunities for two completely different races, it is true that they are also vengeful and that, if they have not yet returned, they will soon.

Custodians likeonlyRace, they were the ones who tried to enter the "celestial lands" that very little is known.
These lands are the most mysterious of all known worlds, and although all the races existed today or almost allare they atof both ofthisPlace, very few dare to want to penetrate it.
The story tells that humanity, in some way, comes from these lands, and that each of humans have "the source" or "vital energy" (also called "soul") that comes from these lands, therefore, the fastest destination is to face the custodians, which is made what the great shock is made will be inevitable.

While it has already been tried and the great forces between humans and custodians have collided (with the help of the giants Anakim and others), the storywill returnto repersely repersely in these lands,by that's thatRazon We are very far from all that happens to Aquf, any opportunity to release humanity will be used to the time, in addition the mistakes of the past can not be committed, but it is

possible that now if we have any other opportunities.

For each reset, security becomes stronger, and the human life level is madeless and lessFree, the humanity that is now living does not resemble anything to my ancestor in these same lands, nor was the one of my ancestor to the previous one, each reset is worse, stricter, withlessfreedoms and greater manipulacid.

We escape from these lands during the "great war" against them, the giants helped us to form a large block and faced them before everything is saon controlled, unfortunately when I arrived last hard debt I know that everything was going to put worse for those who were born here, alsoThey know that many escaped and we would be a pecliminum for all the manipulacity and lie in these lands that they disseminate and control.

Hadly another "new great tartaria" can be generated with all free technology and the great cities we knew how to forge, the truth that we tighten that victory and freedom would finally be our, but, for those things from fate we did not achieve it. We know that it was very close, but it is also true that the defeat will bring more misery to a new humanity, the risk was very high.

Babies who have less than seven months are available to the custodians in these lands, which with their technology carry them little by a new beginning.
This start is sudden and in several parts of the next continents, that's why there will always be apart that nowill haveparents, grandparents, andasıwill beuntilforget it.

Once you gettoNumber that they establish,startedto manipulate the human for the leads to the path theyhavedecided. The vestiges ofa country paving seranStrengthened as own, even when the human of that time can not reproduce it or have the necessary tools, nothing will be questioned while everything

can demonstrated by the great leaders, or media, scientists, historians, scholars, famous and all kinds of fictitious prestige that theyinventedDepending on which the stage of the development is said.

Technology will be delivered in small quotasuntilBeing to reach the level that is also previously established by the leaders.

Custodians are arrogant beings that detest the human being, for them the human is a horri¬Ble, who smells bad and that it does not deserve any libert, the custodial leaders are really hostile and always left for our race. That is why they control it, but also not allow anything to be saon from the preset control, they even would carry out a reset before knowing that at least one single human can escape. The leaders often got together with the intention of eliminating the human race, but there was a lot of debate about it, especially by the tasks that are carried out here, which would bring a lot of a discussion¬Sion among the same custodians, which is thereby a small part that has great relationship with the leaders, many are part of lies, military or poly¬Tools that came to have direct contact with them and were awarded with their passage to other lands, for example the existing colony in "the lands of Mars."
The story of "last reset" where my grandparents could escape along with my mother, who at that time was a baby, was due to the great war that is developing in these lands makes more of 250 years, he put an alert to this race who thought that he dominated these lands with ease, until the union of giants and human beings realized to stag his power.

In the war it is realized that one of its most important leaders Murid at the hands of the giants and this also occasionized that the new human start in these lands (with few weeks of a few months) took place under strict control and manipulation, is what we are seeing in the days that they are and

what we will continue seeing in the next future if things do not change.

Custodians are carnivorous in their great majority, although they can really eat all kinds of aliments, ^ eat human came? This question theI will return to be returned later, since I think it's worth talking about it. They know wellness agriculture, being pioneers and experts in that field, something that will inculcate and educate the human after each reset to carry out these tasks of agriculture and livestock, and then to be able to increase their most as quickly as possible.

They receive pleasure from fear or human sadness, all that "negative" energy can be "absorbed" for them that really end up enjoying it, that is why it is common to see great sacrifices in the old civilizations, or large tragedies, the thirst for the Human blood, they enjoy these sacrifices and in many stories we can find that "they" allow "this.

They reached great development in the weather modification, and is common that they create large ice walls around the colonized lands, this loThey began to use in the last times since they had not reached this development before.
The Murals serve them with great shield to "protect" or enclose even more to the colonized races, in this way it is very difficult that they can escape even when they have to leave some worlds because of needing to go to another search.

Capitulo4-

The lands

Anunnaki

The famous Anunnaki, another of the colonizing races

Dors and parasiticians who are getting sick to the other worlds, manipulating and controlling the children of the children by years and years.

Others of our enemies, a hostile race and

Dent of power. Are the creators of pyramids and

What to visit.

build these structures in all worlds

They are our opinion, the strongest race within this great dome, even above the custodians.

The technology they use for the attack of other worlds is incredibly advanced. Destruction weapons, and the ease of having to enter through going through between domes is also something notorious and that characterizes them and frightens any race. The use of portals for shutdown led to this race to be a step ahead of the others. In fact, the story of the president that the most of the executive is existed between them existed a great conflict during the opportunity we had in the known lands of being able to free us.

And they were also the cause of us that have become defeated in the last known covenant between custodians and Anunnaki.

This race is confused in several of the stories that are counted in the known lands, casually and often adds, but we found in several stories and books of the known lands to the Anunnaki as repwloidous or

reptilian beings, but the reality is that they are very high stature beings (being able to reach 5 meters), live in a zex area of little vegetation, and although the "waters of Horus" seem to be away from paradisiac beaches, the reality is that they are deep waters and in animals live animals like snakes that can measure up to 5 5 meters long and that makes no grace the visit of other beings out of outside.

Its skin color is yellow-greenish, although his leaders can have a totally different tone, but all of them have their very dry, scaly, skin and their eyes are distinguished by the yellow, red or black, and have a particular IRIS (other beings also share) that are characterizedTeirias for a slit, depression or puff g¬Giving being so much and a bilateral generally dark color.
During the so many civilizations in the land¬Nostes have been represented both to the Anunnaki and the custodians (generally the first) in many ways with humanoid bodies and with different heads of types of animals, reptiles, birds, and a synte of them. Confusing the true story of the human being and conditioning the human mind throughout his life for these parasitic beings. They are beings that lack all empathy and are based on the oppression to the other beings and conquest, the thirst. For power and control. In this they look much at the custodians and that is why, they have preferred to share that place to kill each other, although tension is always expected between these two races, which could be convenient

toall theotherWorlds thatare underรินpower.

CHAPTER 5-

The lands

Of Venus

The beings originating in these lands also called "Venusians" and unlike with those of Mars, is that they survived all colonization, but, Ecomo? It is not yet known for sure that this areings could make fun of the brutal colonization that suffered before before the confus¬Dies take the known lands.
As it is in some legends within the giant race, the first humans thought to engage in contact with the venues in originating in order to assemble a block together against the colonizers and so, learn mutually, this happens in the early just before the custodians take surprise to the first hu¬Hands and these will end up colonized in the walled lands.

There are theories that count that some of the pri¬Meters human who began in the lands of Asgard, Lemuria and Atlantida (in conjunction with connection through a portal with hyperborea) could have escaped before the first guard attack and possibly get to be established in the land of Venus.

Venusians are beings that base their pure technology and exclusively for spiritual developmentAnd the benefit on its way of ascending or transcend internally, do not have destruction weapons for the attack and defense, this the custodians saw it from easy access, once they entered their world-environment thought that everything would be simple in those lands.

The surprise I arrived when the custodians stepped on the land of Venus and a large stunning storm this circle-environment very suddenly, did not take the point at that time since they thought that the alii climate, but when the days passed they saw that the storm never retired and that could not find a single venusian on the surface (the storms never stopped until the last custodian does not cross the dome to the outside).

With custodial technology they began to notice that the Venusians were underground, in bunkeres of an unknown technology so far by them, and the storm that whipped alii above theSurface was really devastating. The custodians met to reach a decision soon, they were not going to stay a lot of more Alii. In fact, many custodians started revolt and not seemed to make sense of being dying, Alii, things were complicated enough for the leaders. Many saw it as a failure, and others thought of returning to another time, but faithful to his history they did not give up, and many gueries were in Venus, he even tells that a very important leader has fallen into those distant lands.

The conquest of Venus for custodians was a failure, in fact, they did not fight against the Venusia¬We do not have weapons, to possess them I think it would have been a crushing defeat for them, when the history is known in other circle-environment they were able to imitate it, but with disastrous results, then we will comment on that point.

The technology that had been developing the Venusians was notaNight to themorning,they were and anxues of progress and thosebunkersthey had everything, connectionsundergroundHigh level, the Custodians tried to block and even destroy the area with explosives and missiles, but for each attempt many custodians Morian since the areas close to thebunkersThey were also full of explosives and other types of technology that he even difficult for the approach.

A leaderCustody already in the end ofthisInvasion failuremetwitha leaderVenusian, since it was fear of custodians could try to fly all the circle-environment in retaliation mode, nobody really knows that itI speakNeither to which that day is coming, but the custodians left the land of Venus of the worst form, with large amount of low and with a defeatIn his.

We know because they told us the same Venu¬Sianos that at this meeting Research Advocate for PeaceonHis lands, had requested by the liberation of humans that was completely rejected.

Chapter 6-

The lands

Of Draco

These beings that ever visited our tie

Ras are known for their great technological advance in weapons for attack and defense, as well as great psychic development.
Some of their beings can communicate teleptionally, using this technique to bend to any colonizer enemy, or to be able to colonize other lands.

Etamines through a treaty, achieved a union with the custodians, but at first this was not, but the custodians attacked his tie¬Rads when they were not at their most advanced stage, but all the opposite.

Draco lands lack islands, but two large continents with great vegetation are in fact, in fact, there are alii the most exotic plants of any other circuit-surroundings within the great Dome.

His great ice wall was never an impedicience to be able to cross other domes and conquer some lands (these moli alias were left of the custodians when they decided to put the final point of their full manipulation of ourselves, ^ stopped manipulating them? We really ask ourselves, we do not think no.)

They began by lands out of the domes, as their nearby land of Osiris, but then they moved their technology by the islands of Anubis, many of these beings were left in these paradisia islands, but they use alii lot of the military bases of desa¬Rololo Armamentstics.

Equis happened in the old battle between Etamines and Custodians?

Custodians finally expressed at the beginning since the EMTIMINES as we commented had noachieved the progress that todayonday they have, but it wasn'teasynor were they surrendered, as they know their land well and are expertsonmake up

bigtune¬yous, the custodians had to use advanced technology to finally achieve victory in those lands and leave their imprint of the ice mugs surrounding the dome in that "circle- environment".

Draco's land were also visited by other races, such as the Anunnaki, and inhabitants of other nearland lands, such as the "gray" families that inhabit the land of Orion.

Links with these beings led to today both breeds coexist togetheronA true forternity, both in Draco and in Orion, can be found to the Etamines and grays together.

The age of which these beings can reach are from about 192 years, compared to the years of the known lands. While custodians infected their atmosphere and air that breathe at the time of their attack, today they have no diseases either nor any great war that is carrying out, although they are reconcorated and unhealthy beings that are planning to colonize other lands or take a revenge towards the custo¬God, but all this is mere speculations.

A great flood that even disconneys to its inhabitants are generated to the beginnings, an extra wall is surrounded by its coasts, is technology that are carrying out, it is realized that it is used as radar and that could attack any enemy that wished to cross them, the system of surveillance of its land increase in the last time, product of the

Fear that still have large colonizers so it may be out of this great dome.

It is possible that the custodians and Anunnaki are very interested in this type of murallaş to replace the ice that they create.

CHAPTER 7 - The lands Of Mars

Lands of Mars, Equien has or inhabited these lands that are behind the ice walls and the mountainous walls?

Alli is this great world, crossing the second dome and crossing land that fewHumans have seen some time. Mars has great incidence in the known lands since in those lands, several events were related to humanity and today they are still happening.

This immense "circle-environment" and badly called "red planet", she harbored a great and diverse life inside his dome. This native Marcian civilization according to counsel was totally annihilated by the colonizers.

EPORT NOT IT DEGRABLE THIS THANK FOR A POSSIBLE REFORMATION DEVELOPMENT, OR EXIE, FOR A SEAR OF MANIFICATION FOR THE COLLABILIZARS

Apparently this race was firm in his convictions based on his moral and ethics, preferring to die and extinct his race in battle before meggerigFreedoms in quotas under condition that would impose colonization.

The Anunnaki at the end of his effort was realized

that there was no standing on a single or Marco in the latter, since the last even committed suicide, were surprised, since they did not expect this to happen, in fact, it was his first colonized and after this took colleagues.

The original Marcian race was knew in later studies, it was an advanced race in its technology that prioritized the growth and spiritual and well-being of its community.
They have little preparation and military technology, that is why his defense was almost null.

Custodians promptly took great lands and grouped into the great concentratesVehilling all the knowledge and progress that Alii was left.

Today on the Lands of Mars, they are simply experimental lands where several races of which they generate wars between them and different reasons of almost eternal conflicts are coexising.

The leaders of these lands are both Anunnaki and Custodians. There is a community of Huma-We, in their most conforming by people who belonged to reduced groups. And they won their wayd down passage only for their great work in to deal with their own race in their land of origin.

The best known member who could even be coexisting in the human colony of the "last human" (I mean the last reset), would be co¬Non-scanned controversial Brick Brick.

Who knew about the other side a good time, and confess some of other truths before entirely completely. Some of the so many stories we have for Alii and who are written today in order to move the truth of "Terra-Infinite" and of the civilizations that they expect from ice barriers and the domes

that separate them.

In the lands of Mars also greatly "the" gray "families and some minor colonia draconcon or also known as" etamines ".
Among the grays, the human colony, is an existing rivalry from almost the beginning of the transport of the custodians to humans to Am.

Custodians and Anunnaki monit all very well and do not lose details of them, what had begun in the "land of clones" today takesOut of these lands, possibly this transfer was due to the temporal difference that exists in that environment.

There, the time, as in other so many circle-Environment, or lands within different domes, is different from the lands of Mars.
For this reason the passage to Mars of humans is always welcome, despite the dangers that leads to it is a roll ticket to a long life of almost 500 years in comparison.

There are also other races almost all moved by the custodians in their conquest frenetics for its 178 circles or worlds.
And many other breeds originating in different sectors are also moved towards Alii.

Mars land are considered as a large zoological, where the different conference conditions, confrontations and resolution of conflict are studied Cough, a huge exhaustive monitoring farm and rays analysis.

Chapter 8-

The lands

Of Neptune

Needar, Triton and Poseidon, the name of its lands that shineonthe darkatmosphereThat wraps its "circle-environment". The neptunians if the hanhad hard since his birth, not because it does nothavecould be adapted to their environment and power to livein aweather where thevegetationIt does not abound, but because the storms of sand and thearidwhat is enclosedthisWorld can become really devastating, for that reason the majority of the big cities were created on the shores of its Mas Fertile S lands, leaving a greatportionuninhabited.

In any case, the Neptunians were fixed enough to carry out co-classifications creations, there are such high buildings that exceed twice the known lands, silence is the fairing companion thatangerwith you wherever you will head insidethisDark world, since his sun is also very different from those of great majority and is totally opaque.

Through time and with the great technological development that they knew how to carry out, nothing of the climate or the darkness was a greatobstaclefor them.

Existmoreoverof large cities with very high construction, manypyramids,since the Anunnaki were those who enteredin thisWorld and they seized after a long time of their environment.

Remember that thePyramids are keys in the colo-nizaciónAnunnaki that first begins in a friendly way and of assumptions of exchange of technology among beings, the Anunnaki can be really great scammers and lie to their leaders to generate a close link, and then nail the punky cold by the back.

From the night to themorningThe "Neptunians" were left without anything, since the Anunnaki had planned everything from the beginning, and all salii Segiiim expected it.
It is noted that this is the first lands where they penetrated and ended up colonizing.

The originals of these lands could not face any technology such as that, but we can ensure that he was still in all development, but for that then the Neptu¬Nianos had opened a long spiritual and development road focused on the real personal and spiritual survey, to achieve the Gran Dome after transcending matter.

But neither is it left to the defense to the full Ra such, they had developed a great military power that does not end with serving against the coloni-tinters, although if they were taken a great butt allerged.

At the beginning the Neptunians agreed on the defeat, but as these beings were used for certain tasks within their own land that were obviously enduated by directly benefiting the "HEADS" Anunnaki, rebelled against them generating several focuses of strugglesencarnizadas.
Then the low begans on both sides began, and everything is decontrold in the center of these lands. Tri¬Ton becomes the epicent of an althath chaos, the blue blood of the natives was spilled in large quantity, the Anunnaki are still today their enemies,

and that after years arrived an agreement to be removed from their lands.

Today the Neptunians are now in peace and with a high development in technology that benefits its environment, its spiritual growth and are in peace with the neighboring lands and races, but as it is counted in silence for any new attack that may come from the Neonn Animanki lands or other lands that could generate some danger. Eviajan Neptunians to other lands? It is noted that if they have traveled to other lands to investigate such other races live, generate certain links and be able to explore their environment, but itAccount that have not visited known or spoken land with any leaders in any time.
Although if they know the land of Mars and have been able to engage in contact with the "personal custom colony" that Alii is located.

As commented in previous walls, the Neptu¬Nianos are a dark blue race, it is folded from local fruits as it based on its system can not ingest a variety of food, do not eat Came, and have some friendly relationship with custodians, although it is not well known that, as they are generally beings that always sought their freedom and independence.

Chapter9-

The lands

Of Uranus

Biancos that give the appearance that they had visual difficulty, but the reality is that his view has been developed hyper, and seeing great disk and taking advantage of this as a great opportunity to be able to explore other lands.

They have not achieved great technological development, nor are advanced spiritual beings are neither. They have long winters, for this reason there are storms that become beverages for almost all the year (referring to the local year), 42 years in the known lands can be approximately an anom and half of difference, compared to the first.

They are Longeva life beings, although they are even today under the custodial domain, and its climate was completely modified, as well as its complete "circle-" environment ".
Today his life was to be reduced because they began to suffer extras diseases byThe alteration and manipulation of your body in laboratories.

The custodians penetrated in his world when the "uranites" were at an early age of their development, at first the custodians had not been interested in them either in the minerals of their world, but then all change when they discovered great size amounts of an important mine¬RAL under your lands.

There are large S excavaciations (craters) on its surface, its lands look like ripped by large titanic hands, the reality is that this was caused by custom machinery in the excavacid process. The locals work alii under a great pressure and almost slavated by the parasitic colonizes.
The little development from Alii is strictly stated to this reason, custodians do not want lowNo point of view that these beings become developing evenly.

The uranites today are grouped only in the main lands (its nucleus) called "titania", are generally giant beings that can reach the 4 or 5 meters high, have two very long arms and are fed exclusively of vegetables that grow in these lands OASU around.

The other lands that surround the large walls of this huge world are from the weather similar to those of the Neptune lands.

Chapter 10

-The lands

Of Jupiter

In this huge "circle-environment" we found several lands and each of them has differentForms of life. The natives of these lands are identified with their births and are clearly divided among them, existing great wars in the past between different factions of the same race. They live almost in a constant internal war, this is due to the influence of the Anunnaki when they invaded their lands in an early age.

The great majority and those who rule are currently found in the center (its nucleus) called or consoled as "the land of Zeus". According to the story that could be collected from this interesting world is that one of the high-ranking leaders Anunnaki VIVID or still live in these lands along with the leaders of Jupiter's lands.
Both those born in Zeus and the "Europeans" govern currently and have the other part of the population (Tee, Adrash, Elara, Amaltea, Gamed, Calisto, Ersa and Pandia) in a constantConflict between them, using the division to continue to govern and manipulating the rest of the civilization.

Special mention for "Metis", these lands are only

used by leaders, andnoAnother be can enter without permission of them.

They are beings with great development in destructive weapons for attack and defense, and have almost null¬Spiritual Rollo, SEThey base in a pyramid Jerâr-Quica instituted early by the Anunnaki. They find each otherpyramids almost in all lands ofthisworld, as a clear flag of the parametary race.

Contact with the human being occurred in the known lands long ago, exactly three "Reset"orrebootsback.They demonstrate clear hostility almost with all theotherRaces, they even had several conflicts with the custodians.

They studied a while by human being as they have great laboratories with great scientific advance for modification and manipulation of beings.

These beings are stainlessly compared to (1,40 to 1.50 meters) are known for their particular eyes and a large head. They are carnivors and they are allowed in their great majority of animals that are born in large part of the surface of their lands.

Chapter 11

-Pegasus

The Pegasus Lands, Nearbyto jüpiterand Hercu¬They, they became a great headache to vary races for a long time.
The beings thatallıThey were born identified by their wings, which created based their technology in the explotion,Not so much as weapons that they could use for attack and defense, nor less to colonize other lands.

This leacts against when it comes to facing custodians when they visited their "circle-environment". But surely his surprise was greater when they found that these beings move for the heavens without great difficulty for their great metal wings that bite from one side to another, almost dancing throughout the firmament of this beautiful world.

Do not require great effort to take these lands, and the "Lantianians" as so they were called by their large central lands, they reached an agreement with the custodians that terminate damaging.

They lost much of the wealth in minerals of their lands as they shared their technical advance and in this way they helped more to the custodians to be able to advance in their development to penetrate the "celestial lands".

The "Lantianos" were highly highled from the real plans of his colonizer, and were revolved vacations that ended in mases of the winged.
Some count that this raceleaveof existing and there are other versions that have seen them even in other lands, but they are confused with the beings called"Angeles"From the lands of his same name, since it is also close to the land of Jupiter and they also have large white wings.

Los Innomes usually take their long white hairs, with great development in alchemy and scientific advance, are not usually hostile with other races but they brought to their race to the criticismpointof his disappearing fromriciönBy fighting against his oppressor.

Chapter 2-

Aldebaran

In "AldebarânB "Live the"Taurinos" and have a great relationship to what you know about past storieslike"The Minotaur",thatMonster of bull head and human body.
The taurinos are afaithful reflection of thatRepresentative, which injuring youself border we could find a direct relationship between the Taurine

And human beings in past reset, some stories of the giants confirmed that the tours are fed from human Came. But in the last times the Taurines demonstrated being benevolent beings that knew finalize with the custody domain has already a lot of time.

Since then they are not well seen by the races that dominate within this "large dome" since several races and species that were about to be extinguished, even to those races that could not develop all their potential for the tissues of the aforementioned parasites have saved.
Its genetic material has been modified on several occasions, but they have not been able to modify their empathy and their love for life in other worlds. It should be noted that at the beginning of its development this was not so, that great rams were carried out within their territory.
They are carnivorous beings (only) and today on the day you can find them dispersed in several other "circle- environment", they are also beings that were dedicated from the beginning to the development and spiritual, although tam¬Well great knowledge in explore and weapons ships.

I have had direct contact with some taurines, as they have lived with the giants "Anakim" for a long time, have shared their techno and logon with us, and they have helped us a lot to survive after the "Great War". It is very common that both the giants, the taurines, titans and several other beings are represented in the stories that are counted in their lands as malignant beings that feed on their pain, suffering or even from their Came (although this last in a remote past could be true), for that reason the representations of their imposing figures are often rejected in the "new humanity".

They are beings that can measure up to 4.5 meters of altitude, and differ from the rest by its large s> can often cut from small.

"Aldebaran a" has animal and vegetable life, but the taurines do not want to live in that area for a violent past where a lot of blood is spilled. A great internal war between beings of the two land I wear to the complete extinction of people who live
Alii, for that reason and respect for the memory of all that Alii have lost their lives, decided not to use them.

CHAPTER 13

-The lands

Of Saturno

The "Saturnians" are beings of very high height, they are going to measure up to 14 meters high, its psychic development with its imposing figures, makes them very strong beings, for that reason and for its great technological advance, they were never conventigated by any parasitic race.
These lands for more than they are giants and they call theattentionFor its big Rings, they were not visited until it relatively little time, when the Anunnaki visited them for the first time they arrivedto a rididAgreement that they see these lands and the very native and difficult native beings to colonize.
The Anunnaki came from time difficult for many wars in several places, especially in the known lands, and they did not want (or rather said they could not) have another great war, they know that they do not noticing many possibilities against the Saturnians, for that reason they preferred to carryA relationshipAmosa with its leaders.

The curious thing is that when they tried to find leaders, they realized that it did not work in this way Alii, thepyramidHerarchy of which they were so used to not existed, there were no leaders or nobody who represented his race, simplyAll tangle as a whole, their great psychic power is united to carry out decisions that meet everyone and who benefit the race of these, these titans were really united.

The exploration ships that possess were extremely advanced for the time, and it is realized that these learned to the Anunnaki on "the Gran Dome" as they could visit it on several occasions.

They were denied to aim to help them to penetrate the "celestial lands" as they consider it savages as many other races.

These beings are frugivorous, they usually have a blue-like color in almost all her body and white tones in their abdomen.
These titans visited the lands known on several occasions during different reset,Wearing thousands of stories that are today encontamous with mitology by custodial manipulatory.
Some have been immortalized in the known lands, you can find them in large S Embraces, mountains or trees as some of them suffered from custodial technology long ago.

Along with the Anakim, these beings are feared by the custodians and Anunnaki since they consider them a real danger in their conquest plans of the "Tie¬Celestial Rras ".

Chapter

14-land

Of Orion

1.30 and 1.40 meters high, are beings of great psychic and scientific development, their laboratories are extremely advanced and without doubt the best that can be found within this great dome.

They have been experiencing with many races, they have in their knowledge, about all of them, existing here, and the custodians have used them on several occasions in their obsession to try to entertain the celestial lands.

But as all the attempt was a failure, many of these beings were dealing with analyzing when he is in the depth, being carried out abduction and other genetic tests.

They are beings that lack empathy and are generally hostile towards humans, only on some occasions showed compassion. But the cases of abducted that have really had bad experiences abound.
For a long time that they abduct and experience with human beings, in fact in time before the last reset and other resetters, they already experienced with us, theCurio So was when they tried to make a domestic time in the advanced great tartearne, where the free energy and a very high technology was controlled for the time, the ships of the grays are almost reflected by thousand every day.

We could call them brothers from the beings of Zeta Reticuli, since his races are intermingled and today together coequite.
In the previous evidence to the great war, these beings were in control of the known lands for a short period of time, since the custodian leaders and Anunnaki had had great problems of surveys in another "circle- environment", this was taken advantage of by the giants and humans to carry out the greatest upgrading of history.

Grays were bold without being able to do anything but go in search of custodians, these

Beings were expelled from the lands known by the giants, this jams forgive it. And if there were subsequent meetings with giant leaders, it is well known that they detect them and that the feeling is

mutual.

The biggest leader of gray gray beings in the tie¬Known rays, that genener that elevates even more hatred that people have to humanity.

The grays colonized independent lands, but they never reached any other "circle- environment" on their own account, the beings of Zeta Reticuli were colonized by the Anunnaki and used in their great expeditions towards the exploration of other lands, instead Origon's grays followed a similar road, but on the custody side.

With the great difference that Orion's grays were real revealed when human survey existed, the death of his great leader chance of a deep hatred towards custodians for the task of taking care of lands abandera.
Several battles existed among them, whatfacilitatedBut the power of the great tartary on land Know¬give.

While never everachievementHave them of allies as they hate the human being. The truth is that if I existed¬Bio of technology among gray and human leaders, but they fell in the hands of the elite and it was¬Ron used against and for the destruction of the race itself.

You can find gray beings also in the
Mars land, whichit isa large land it¬Such control and the Antennaki control as many as controlled.

The Human Colony Alii faced in several opportunities against grays, but were defeated in all those batties.

They use the cloning to subsist as race and are very robotic beings in their functions, they are lack of any type of emotion or empath.
They were very close to being totally exterminated in the past.

CHAPTER 15

-Pleyades

The "pleadyans" are very close to the known lands, they are very high beings that guarantee physical similarity with the nordic.
It is noticed that his ancestors survived the battle of Asgard against the custodians, and then stairs to those lands in the pleyads.
They are generally benevolent to the human being, but made a peace pact with the Anunnaki du¬Rating an early age of its development.

They are based on their development and spiritual and improve their living conditions. His "circle-environment" is believed to be manipulated by the Anunnaki from almostHis beginnings, for that reason they suffer "Natural Teachers" every time. Trying to improve its current situation, although their lands seem to destroy ascended.

It is believed that this was implanted to force them to have to escape from Alii and look for refuge in the tie¬Known rays.
While many of these beings visited the known contents (especially in the north income for Asgard), they do not feel comfortable living with humans. They were looking for other alternatives, but they were a failure, they did not have only lived in any of the lands that are behind the "walls of mountains".

These beings did not help human beings in the great war, although not to the custodians, they simply kept the margin, well

There is good relationship with the giants, they do not see them with good eyes as allies, since they proved not to be interested in humanity at times of delicious history.

Anyway, its great spiritual advance is worthy of learning, they are beings that could help the humans quite on their way, and lastly there are more pleadyans by entering the known lands.

It is estimated that in the near future, they could emigrate in large quantities and coexist in these lands, accepting certain custodial conditions, it takes this to be this at the moment.

Chapter 16 - The lands of The clones

This is undoubtedly a very extra earth, it was created as "first earth Mars" totally experimen¬Mental, although I was not used for a great time until they moved the idea to the "land of Mars ".

The first to penetrate this "circle-environment" were the Anunnaki, finding only life in a very early phase of development. It was used immediately to transport some of the breeds that dominated for then to create an experimental site of conclusion and race development (n) that does not prosper and was almost destroyed.

Then I used as cloning lands, to save lives of important leaders of the different races, for that reason, that characteristic name has. Exist a leak of beings that were used for cloning that had to pursue for non-gene¬Rarled big in the different worlds. This also happened with human beings that were used for cloning, who escaped from Alii, these beings were robotic and carefish of any feeling or empathia, without a doubt all this was another aberration of the parasites.

This experimental land today is on this day abandoning completely, they are one of the so many forgotten lands that some day can like someone can reuse him, the pleyadians also have these lands in view to be able to make a mass transfer, but the truth is that it is not known what you can find Alii, since the great laboratories were abandoned from the night to the manana.

Chapter 17 - The reptilians

These beings are many times confused by Anunnaki or other beings, but the reality is that they live very far from the known lands.
While they have visited them on several occasions and have stored direct contact with leaders, they are beings who prefer to live away from other worlds.
Generally their homes are built underground, and these advanced reptiles have shown great hostility to the human on several occasions that have been found.
Generally if you visit other worlds, they do so to implement subterranean bases that could be used in the future, since they monitor everything from Alii with its advanced technology.

Although they have a whole circuit-environment for them alone as "Lascertland", the great majority prefers to live in "the island" close to that world.

Alli have a large subterranean city and although they live in independent lands, so they seem to prefer it.

They have had in the past large wars against the Anunnaki, and are considered of great advance and development of weapons for destruction.

These beings have won their due respect by the great colonizers, have not been used as beings for lower tasks, norhavecould be brought to them lownoappearance.

It is very possible that if they had to choosea bandingIRAN in favor of custodiansonA possible and fuerte war against humanity.

Capï tulo18-

The lands

Celestial and

Other worlds

Extraterres-

Three

There are many others the worlds thatareleaving out ofthisbook, and that soon be stillllarâabout them. They are so many the extraterrestrial breeds that fight to survive before a system that would be waged to rid themereLuck of the destination of each one, those who survive or those who die.
It should also be noted that there are many others, although to a lesser extent, where peace and the reign, recipes because the parasitic races did not see nor found anything interesting, it takes the monitouble from afar away or simply his solid was later to visitsin theirLands and go unnoticed.

Other lands, as we have seen, did not even manage to develop completely when theparasitesthey entered their worlds and emptied their lands
Along with their dreams, inserts of bloodstream completely its history, manipulated and changed their future forever.

The human being burned and could not yet turn the destiny forwhichIt was created, his kingdom was tornado a long time ago and notseems likewhat will leave the throne soon, it takesit's timeto reveal beforethe des¬Pota King.

It is true that weighing at least three colonizing races, and that although we continue to stand we are spiritually emptying every day, the death of the human being will not be FFSICA, but will be when the

point is not coming to be there in the known lands that knows that inside its sufficient potential and spiritual to be changed to all.
We must also learn from many other races that Veneer managed, we will follow some of his technical services for Veneer to oppressor and manipuating power in which there is always here, many of those races are willing to help on the way to the des¬Realtar and human freedom.

It should not be forgotten that the heavenly lands, the mysterious and hidden lands where the parasites James were able to enter (and that who tried with all its technology together,), followGiving our secret, the one we only have us, humans, "the source of life". Maybe we are the nexus towards the other TIE¬Rers behind this great dome, the fear of the colitizers is real, because they can not manipulate our essence, only manipulate our physical environment, nothing can give us our interior, it's time to wake up.

Second part

-The interview

To Helen,

The lands

Well known and the

Ultimate reset

CHAPTER 19

-The daughter of

the

Navigator

Born in the

Republic

Ancestral

Emptens that official versions do not inform us about these worlds and what is the reason for their visit to our lands?

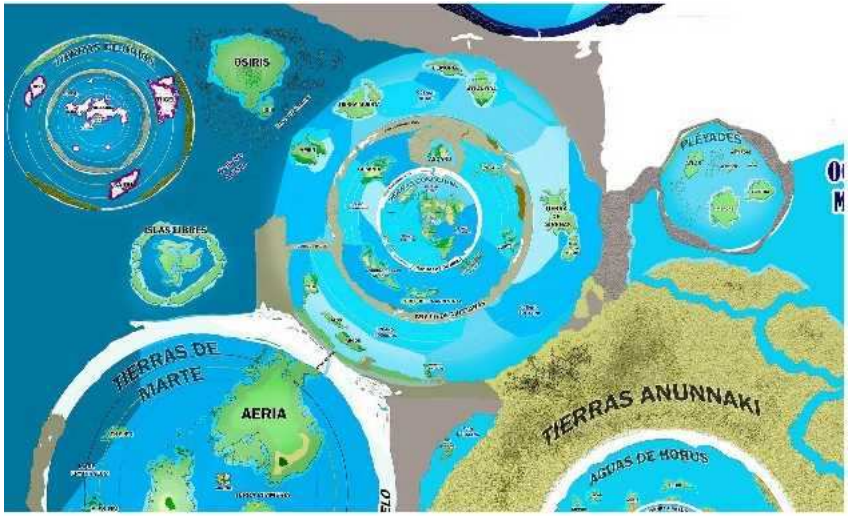
These questions are something complex to respond quickly, but I will try, there are many continents behind what you know as "poles", I would call them barriers or walls, can be ice as in the antartid and in several other parts, as long as you can see, although there areVarious types of these barriers in both the world known and outside.
I have visited its land as many times as I consider me part of here, but the ancestrals have even visited other worlds repeatedly, and thousands of other races have also visited us, both friendly and the most cruel way.
We could say that I am also part of here since my ancestors were born in these same tie¬Rad and lived here until the final day, from Nina motivated the idea of being able to return and step on my mother's fender and grandparents. Theios left their lives for the freedom of our entire race.

My father is William Morris, and I must tell you that I was born in these lands like you, I had the fortune of being able to cross those imposed walls of Ice, artificial who created the same parasites that control them today and achieve to find our lands, I mean "the ancestral republic" or as you

I want to call her.
Alli met my mother and formed a big fami¬Lia, I have the best memories of my dear father who luckily many know how to get little and soon a large part knows more about the threads where I was born.

CHAPTER 20 - William Morris, The man Queintento Change the

Rumbo from the Humanity



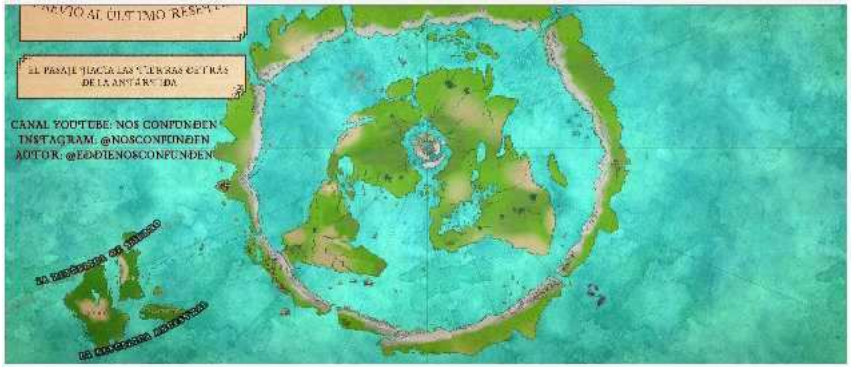
My father with 34 years and a great experience in the continental Navy known a person called Butler who was infiltrates in these lands and that he had also been born in the Mias, for reasons that we can not say, but with a team made up of several experienced members in the war and above all his experience in Maritima navigation, and despite the thousands of complications and thin

You were greeted, they could enter the polar area and cross those walls and then find our lands. It was easier for my father since it was obviously led by an experienced captain that he knew the way very well.

It was not everything randhip as at first it seemed in the history of the first book "the navigator that crosses the ice walls", the reality is that Butler was an expert person in the theme of the navigation, since it was the "Naval Council" in my lands of origin.

He has visited these lands many times more than I imagine the world, is one of the most has made and contributed to us to infiltrate us and putting the plan that he had now devised with my father.

As he commented earlier, they have fought along with many of us who followsWe fought for these lands, which we keep in our heart and that are both our lands and theirs, although I do not feel like it with obvious reasons on the damn race that is in the power and manipulates and prevents its development freely, these lands must be of the human being, I mean the real human being, not to that false couple that only sets the head of what is upstairs, it must be our because it is dictated from the "landland." until hyperborea, the human being should not look for escape but bend to spill to his colonizer and expel it, I understand that what I am expressing is certainly complex to carry out today, that is why they were built an alternative plan, which is to take the hustle of here before the next reset.



CHAPTER 21

-The lands

Next

Our lands have a different name to all that has been named in the stories, and surely much of the continents abroad too, although many keep the

spirit of the great stories and battles that you have taken here, I will not annihilate your dream or confront it with names, so I prefer that my lands remain for the moment with the name that some know it, "ancestral republic" is well since

It represents what we are, the human survival ancestors prior to the last reset.

We are his ancestors, although the lands were different before the "Ice Walls", our parents and grandparents were born, fought and some were here. They nor do they imagine the number of stories that are counted on my lands on the great Heroes that it was forged, as sooners were also born in my lands that have made great prowings in these regions.

Ecomo is that you speak English? What is the language in your lands?

In a land, a different language is spoken, na-Tivos, especially in the main city, but we spoke many languages of their lands, our parents escaped from these lands to start starting in the outside fields, escaped from all corners of this world you know, thenThe other lands were different communities, but at the beginning, when this happens, each community was divided by its culture, it is important to create own language and own culture to generate links and that there are no divisions between ancestral humans. After spending many time they already use our native language and even even the language of his father or grandfather, this happens more, as he commenders, frequently in the big cities, but we try not to lose the connection with the past either.

Epfor that they escaped their parents? Or better than that ours or from those who escaped?

They escaped from the worst war that has ever happened here, and they did it because there was no alternative, escape or die, since everything was perished.
Forgive me that I get emotion when I talk about this Issue, my grandfather Murid in that battle like so many

Other mills they didtambiěn,my mother is-CapoBeing very small in my armora's arms, the giants saved many people for that we are eternally grateful.

CHAPTER 22-

The giants

Of the great

Tartear that

Wanted

Would release the

The giant race joined the human in the previous reset, they came from outside to free us from the

Vil Opresion Custodial, believed that it was the timely time to join and wait until some of the custodial teachers will return.

The great tartary, that which was erased from its maps and its history, was the perfect union of the giants and humans, so the past of the giants or the giants-humans are always hidden, or simply manipulated his story with full-minded tales tied with myth and in many ways they are seente as "enemy of the gods".

It is simple the truth, and you can see with your own eyes in the future, the only enemy of the gods and to break with the free development of the races, to start and destroy spiritual development not only here in the known lands but in many of the other lands, they are undoubtedly the same colonizers, the enemy race that destroyed dreams of the past and destroy those of their future if they leave them.

The giants only demonstrate their greatness to manually hidden to not generate more dano to the current human being, since in the past everything has gone wrong and that is why you are paying a very high price. These lands that are the unique that you know for now, have their oceanians having an ancestral blood, our blood, who tried to change everything, which were very close to achieving freedom forever.

CHAPTER 23

-Humanos, Giants and Custodians, the Great war

Of the last

Reset

The great war be as quickly that there was no time even to understand what was to be

Tedging, the custodians attacked the big cities, so they always do it, go directly to the central power to weaken everything from their nucleus. The giants notified in his visit to humans that custodians had the plan to contaminate the air that Aquf was breathing in this world-environment, already wishes other continents of the domes, but not in great detail, neither was it wisely on wrestling and custody hostility. All this knowledge that we were acquiring over time and the help of the giants, was taken out of great part of the information that the CUS¬Treaties prior to the great war.

Another lower race was at the control of these controls and this was taken advantage to develop all the potential we could reach in the shortest possible time, plated were carried out¬Incredibly organized, everything worked as a great watch, the advance of the great tartary no

He was made of a night to the manana, but he was not long in terms of time in these beautiful but terrible s land.

The walls did not existence for then, the continents were different, although they did not change in much, they manipulated their lands, their climate, their environment completely in the new beginning, they were not going to add jamas that were close to losing their best colony, and much less in the hands of the "giant barbaries" as they call them, and the humans that they really detest.
Ancient map sketch representing the known lands before the last reset.

Chapter 24 - The destruction Of the big ones Cities, the CAI gives a Empire

The big cities were invaded with black smoke, the giants brought technologically and they encouraged humans in tartaria, the level of technology that was used at that time there was never overlooked humans, it was a difficult process but great things were really achieved, simply the great war reached surprise, if

We hope they were waiting for her, they did not think that you would get so quickly.
Then I arrive in the great flood and different at What, I arrived a moment that we knew that everything was lost.

The custodians were weakened and those who were to the power, the grays that were their lacches could not face the power of the anakim, the giants who helped humans with their technology. There are several races of giants and not all were united in this war, in fact many were divided later when he does not agree on Pre Star help, they see him as a safe defeat.

At that time the hope of being able to beat them was latent and that filled the spirit of anyone who viva in this soil, the sensation that generates being able to be finally free is not price and sometimes it is not taken into account the dimension of what is being carried out, that war was the most cruelthat has happened here.

He brought brought with a great reprisal in a reset and a different start, which is led¬Having out this time, the system that oppresses it and makes it a robot with mere biological diets, the emptying and spiritual, as controlled by your mind that is not for a second to give messages and messages so that you can not enjoy the present, all that is the product of that customary fear of being able to lose its best colony, unfortunately the ancestral loaded with that, and the giants too, for that and for many other reasons, different plans of being able to be able to free them and finish from one with all this maca-broad system under which you live.

Many wonder ichomy is that we can give all this information as valuable and at the same time dangerous if it falls in wrong hands?
His answer is that we can give this kind of information because most simply not believed it, and what we say Aquf today will be forgotten by the majority, is like when someone has some kind of

different experience, with the breed that is, or for example the story about my father and the land where I was born, but different is whether the government of this world is the whole of the world, and for example, that the sky that you see every day is pink, then many leave it to repeat and even fight to death with you. I fight to death with anyone who tells the death. Diegue that the sky He does not have that color, even more if important scientists who have been received in distinguished units, are coming to say that anyone who tries to show that heaven is I was found Cataloged Ignorant forever, and maybe it affects you all your life, then you have already two things in with¬
tra, the immense power of the word of the big diffusion that are controlled and thatEnter in each home from all over the world and inserts you have the trusted word in quotes, of the great scientists of the best universities that lewill givethe strength necessary to immerse the majority to a lie thattakeas absolute truth, soon nobody inclusdiscussabout it'stopicFor fear of being cataloged as ignorant, some or want to look towards heaven for fear that his own mind tells him that he does not have the color they say.

Other few fewfightagainst that lie without imagging what they tell you or that they are marginalized from many places, or not theleavedon't even talk aboutthis matterWith a simple censorship.

This is nothing new for you, look at your surroundings nowadays, what isishappening, if it does not or say what they impose, or just the

whatthemediathey report or what the distinguishesthey expose then you will beCataloged assomeone whoisof theside opposite to "progress", to "advance", or to"Development" ofHumanity (with many quotes).

Possiblywill beRidicused, attacked, left side, shot as traitor or many other things, this is undoubtedly unfair, the parasitwhatControly intheshadowwho want human total degradation together with spiritual emptying can catalog to another with their great means of influenceandCoercive and in this way to complete it destroying it. That's why we continue to return to these lands and we will continue here, to fight against this dangerous conditioning they they exercise.

CHAPTER 25 - The last Reset in The lands Known

The previous reset has been the most cruel of all, because they were close to losing control, it could not have been otherwise. It even realizes that there were periods where humans and giants were controlling the situation, but once the four big S Cen¬
Three, the millions of deaths that left the war, was difficult to recover.
We all know at a point we had been defeated, my mother told me so many times this story that in turn was told by her mother, I already repeat me, I was just a recreated, ind? They understand, they live in a world prospered and suddenly all their dreams were trampled, many found them with loved ones who have died next door, their houses were on fire or directly they had disappeared, they use technology that you do not understand, they could even petrier beings, have already done in the past, they had to be seen in a really desperate situation.

When everything was lost, Ignored the great flood, as is here, the flood of Iodo, in fact this happens in different ways but dragged everything in its passage, was something colossal dimensions, many of the humans who grew after the last reset usedvestiges of these monuments or buildings, even some had had supported well to the gue¬RRA and theflood,They were resistant to ancestral technology, they were prepared for everything, so younoticewhat many of youimagesOf the past they do not agree with the reality that people live, the difference of technology and architecture, they mixed the history of Tai so that it is difficult for you to understand it completely, but at leastit will have aCorino idea was giving all that process.

Reset, with some other difference that existed, at least from which I have knowledge are almost always carried out in the same way, they puta limitof years for the race to whichareControlling Have I can develop and get thereto a pointof knowledge and technology,tryalways manipulate reality so that i

getto that pointbe the slowestPossible, really take it as a game,bâsica-mindtryPause your spiritual growth and the truth about your origin and your world-environment where you are clearly neverwill giveto know or youthey will have anytype of contact with them, butwill be able tofind them in the history of several forms and possible ways.

When a "reset" is carried out, we go to 11a- "Marvel", considering that itLEGÖ LIMITEof previously established, theywillthat all those who exceed seven months of age die, this may be decided also withadvanceor it would simply be thought of that moment in meetings of the"DomeParasitic ".

Thefloodwho suffered my parents, and grandparents and all thatgenerationit was the same as it had happenedonCase ofhavearrivedto the limitof development of years, only that they started this urgently for the war that had been unleashed,

The last reset in these lands not reached the limit of the time they had established for our development, but we were not very far too if we consider that when the giants visited and joined us in these lands, they began to educate us on the lands and the existing life behind this world-environment, we start learning to too many things that they considered dangerous.

In order not to make this answer so long, his babies seven months or less than that were left with life (not all, they decide depending on many factors), those who exceed that age will be killed or mourn in catastrophes of different types, this "world-environment" is just manipulated in its entirety by them, imagine that you live inside a greenhouse, you can understand that way, you can make it bloom or poison it from a DAY to the other or even slowly.

CHAPTER 26 - THE

Below

Delviajet

William Morris

My father returned to these lands, to the lands where he was born, said an opinion after day planning again and again as he could return to help those who was he had left, "to his brothers" as he referred to.
To know this great and painful truth was killed by every day, imagine that you know that your brothers are dying alii in in a real in-

Hover of wars, manipulation and pests, and that nothing can do on the other side, where they are danger so much life, since then the customs¬Dies had begun to attack the all-alone land, which until then had been silently.

Not only that, but the custodians had found a large city of giants and gigan-human who were not only traitors for them, and therefore they were worthy of the worst punishment.

As is told, the Anunnaki did not decide to take part of these attacks and custodians were quickly expulsed from my lands, the technology that was then raised was quite advantage again thanks to the help of the Anakim.
This surprise the custodians who returned to the land known with the fear of the possibility of being able to lose them.

They then tried to reinforce the walls with all the technologies and military possible, a good time of treated and ridid-based ridfucies was alienated throughout the area to prevent any human being
You can reach this truth, now, (: was that sufficient to prevent our ships from going through their bases?

Chapter 27 - The Infiltrates They double, Problems Too

At least the custodians were expected to have in their colonia more precious about 14,000 antifatible anchors, this network that we created was part of the Morris-Butler plan, along with giant leaders, and several races that were also participated and still participating in silence for human liberation.

We wissed the danger of infilting us in these lands, since the custodians will have to know that this amount was infiltrated, helping and informing many human beings on the other worlds, the spiritual potential and the true HU-
Mana, this could cause immediate retire, everything was delicate and we could not make us notice in a rusty way.

At first it was not a big problem to overcome the barriers, military bases, custodial technology (with radars that even cause earthquakes) and a sinfl of obstacles that we knew. But, not everything was happiness and we wissed that sooner or early could happen, an alarm turns off (earthquake) near what you know as an artaic peninsula or we like "false antartida".
A group of people who travel from the ancestral reputation was found with a military base that patrolled the area in a branchpehiel. The our sinks said boat when trying to escape, and this irremedialy did echo in the great spheres, they began to pursue all by all the corners that can imagine.

With the great lies and excuses they got in homes in many countries in them, we were stated in ten years or more, they were looking for any track and started using technology to control movements of the new humanity. Although they have already this type of technology, the completely reinforced after the incident of the peninsula.

All this complicated the plan, and it was a complete backdown as we had infiltrated people in high spheres, politics, lodges, organizations,

Companies, universities, etc. This was a splice of waterFrostSince we have been counteralling with our technology any detection cus¬Dión and a great advance was being carried out to finally carrying the time transfer of many of the people who were able to wake up.

Many of the 14,000 had to return, fear was already reality and some ancestral died from the worst possible way since they were sentenced as traitors, I will not detail the so many tortures they suffered. Captain Butler returned to our lands in Soledad, never forgetthatday my eyes are filled withtearsBecause it was the day I knew I did not go back to embrace my father.

Chapter 28 - The death of William Morris

Butler approaches my motherandto me, cabfizing, and her eyes in blood, was also hurt in an armandOne leg, those ten or fifteen meters were the most eternal of my life, when he was finallycloseOf us, I looked up and could not contain its crying, my father had died in the known lands on the hands of technological-military technologycloseof the antartic area.
Custodians had given delivery command and military leaders of certain countries, advanced technology that they did not even know how to use, this was extremely dangerous for all life within the walled land, in fact, the cus¬Todos wishes very well that this was a big mistake and put at your risk in the same colony, I think that although they were experienced in the war, they did not handle that a race could be overcome or the danger that I was worth losing those lands.

They decided wrongly to give up te¬Nologia unknown by the new humanity, only to be able to help them in the amount against the ancestral who were returning to their lands (many humans were also doing it next to them).
It was also delivered to human knowledge about climate and manipulative modificationCIO of the environment, the custodians really entered into despair.

The ship ("Iron blue") where my father traveled with some ancestral and human of the new reset disintegrate in the air when they crossed the antartic heavens.
A great invisible barrier was created by the custodians just before the dome, of course this was not knew for then and many ships were destroyed. In order to be able to understand in a simple way, they blocked the part of the dome that we had opened by air. Butler returned with William in another ship and discover in detail about my father's

death, Butler achieved survive from Milagro.

It was undoubtedly the worst moment of my life and I'm! Really a lot of frustration and impotence towards these lands, at that time I forgive notion of cus¬The other and humanity, I only thought about whether it was really worth my father to die for a cause that it seemed lost from the beginning.

With time it understood and now I understand it, I'm sorry in my heart, I am also part of these lands and I know that my father wanted as much as I now, that humanity is free to be frequently.

This technology that delivered custodians to some leaders of the new humanity would also have brought several inconveniences within the known lands between countries that used part of this technology to threaten and even attack, the use also to make disarmation bar
Cos, aircraft and all types of transport, people who disappear disintegrated to them. All this added to the knowledge granted on the manipulation of the climate and the environment, was, in summary, a cotic ego that continues today.

Is feat feSince then humanity is destroyed in wrecks absurd with the weaponsbiological,Or that the custodians decided to reset by fear that they were exterminated, 6 even that humans used this technology to attack them, obviously the third option was the one that was far from happening.

CHAPTER 29

-Convert

The farm

Human

OnEternal

Freedom

I understand that they may be wondering, genton when you have all the plan? And it's a question that I want to respond before finishing.

The changes will happen, the plan never began donate, in fact, after my father's death, thisImpact More in the Republic since William was very dear to Butler and represented the face of freedom and direct link to the known lands.
The fight against custodians never cease and follow firm against their oppression, manipulation and control of these lands as asfire also other races, unfortunately we could not pass to the next phase yet, because this requires time.
The new humanity has a lot to travel in this spiritual path, first must be released from their own mind, which controls it and does not leave it a second to breathe, to be able to silent those internal voices that are not more than a custody control that implanted from the beginning of this last cycle.

The thousands of thoughts that come to their minds control them and often break their dreams, in their most are simply nest thoughtsGaits, the competition to which they are subjected and the division between you for almost all the causes that are carried out are really exhausting and can take itto the fâcilRoad of thesurrender. This drenajEnergy and sinking fabricattation constantly to any breed of any world and there were universal of time ago and you are still standing, only missing that the majority knows where the true enemy is, its macarbos gamespsychologicalthat generate division between you, and that they manifestthisControl and conditioning.

The new humanity has a resistance to admirable adversity, and infinite potential of spiritual growth, which is something that should be exploited and that can be heard from an early age. Elios on the other hand,trymanipulate children with weapons

and distraction,to bombIts mindsAnd they continue to try to create robots that follow their dogmas and patterns without asking anything. They will use as always, the great s media, men and women recognized by titles that are only delivered in the corrupt universities they call distinguished or outstanding, of which very few have access, they also used to part of the manipulated science and to all that put on their way they will try to ridicule first and then attack it under all possible forms.
I do not mean that studies are left or universe¬ities, but the opposite, it is likely to one of the forms to be adding Alii and be the best in each field to modify from all within what this corrupt or manipulated by them. Anyway we have a totally different system to the current on these lands.
Within our plan, this is also found, in order to enhance the greatness of the royal scientific advance, unfortunately ancient and giant-human progress was destroyed or it's just¬Condo of the new humanity.

We will continue with the struggle to understand this humanity, that if they come into real love nothing the detaine, that their brothers are alia outside and also here inside waiting for the indicated Menta, that we never abandon them.

Many lost their life trying to save them and as! Sayhold, being ancestral technology will seek looking for the way to end this control, there are many other races that exceeded custodians and could be released, this is possible, but the human being is not going to be made easily because it has within what no other race has, we are the "source of life", the possible reason for this great

Dome, and surely direct connection to other worlds ally, we are different and with a potential that you can imagine with all the condition received in a life in

these lands.
We follow in these lands and we will continue here with a foot, fighting next to you, those who awoke from this bad sound called human farm and want to convert into an eternal freedom.
